

Course Demand Analytics

Reduce Barriers to Completion

Create the optimal course schedule so your students can access the courses they need to graduate and your institution can eliminate the cost of unnecessary course provisioning.

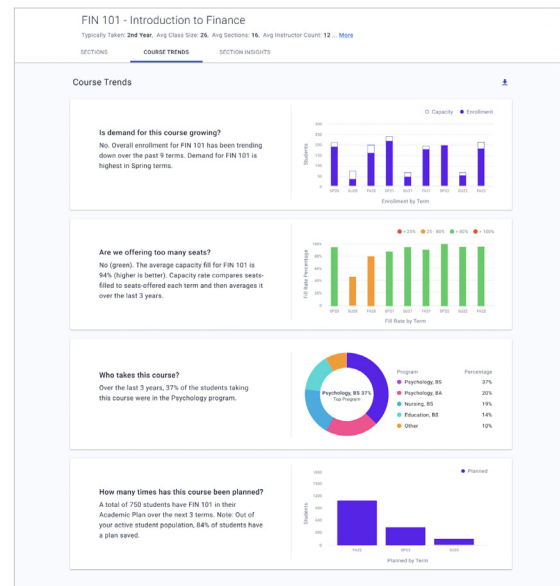

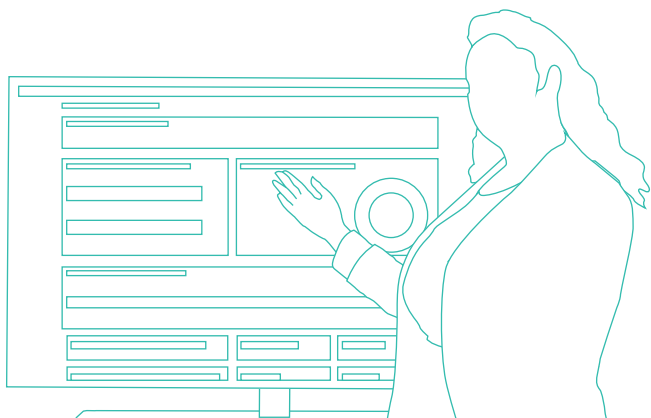

In a Survey of Civitas Learning Partners about Top Challenges to Student Outcomes:

88%

said it was critical to address course availability for their students

84%

said it was very important to be able to accurately forecast course demand to correctly allocate institutional resources

Use Actionable Analytics Specific to Your Institution to:

- Optimize the sections you're offering with confidence.
- Establish the right mix of online, in person, and hybrid courses.
- Understand historic and current course enrollment, fill rate, and waitlist data.
- Reduce the operational overhead required to plan out course offerings.

Build Your Course Catalog

Stop copying and pasting last year's course offerings and hoping for the best. Use a variety of predictive data points to forecast future course demand so you have visibility into capacity needs for what sections, what modality and when.

Make Strategic Adjustments with Real-Time Visibility

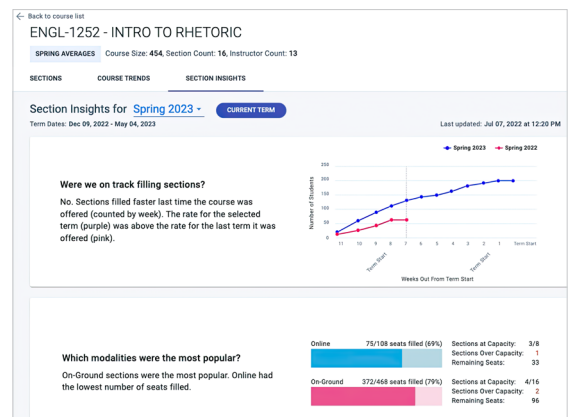

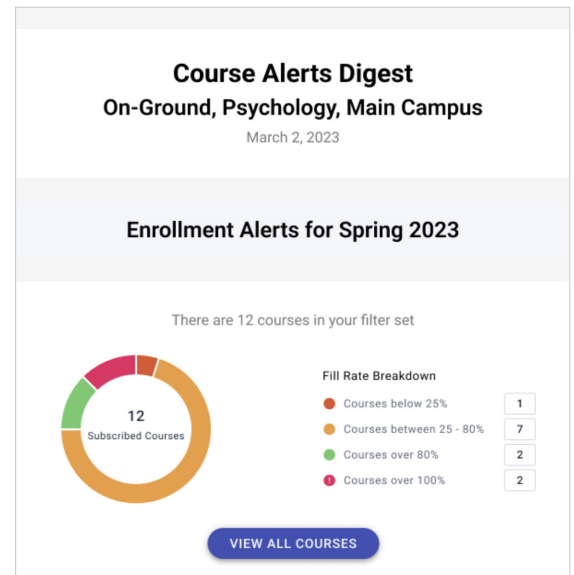

Set up alerts to monitor and manage course capacity and quickly filling modalities in real time. Decide when it's time to open new sections based on configurable alerting tools, rather than navigating registration season with constant oversight.

Empower Shared Decision-Making

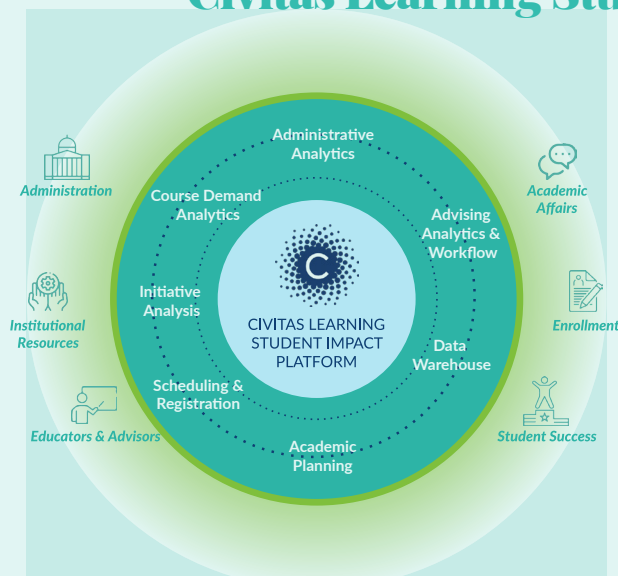

View consolidated historical, current, and future course enrollment data in one place so that it's easy to understand trends and anticipate shifts. Equip program leaders to make strategic decisions with access to comprehensive dashboards and shareable reports.

Improve On-Time Completion

Never hear, "I'm graduating late because the class I needed wasn't offered," again. Build student academic plans based on data-informed insights and offer courses based on student needs, ensuring a process where students can access the courses they require to ensure on-time completion.

Civitas Learning Student Impact Platform

Course Demand Analytics

is part of the flexible Civitas Learning Student Impact Platform. It empowers institutional leaders with actionable insights such as centralized course data, real-time enrollment monitoring and course demand forecasts. When used as part of the full platform, institutional leaders, enrollment teams and student success teams can also design effective pathways, create tailored academic plans and prescribe personalized interventions to create a comprehensive approach to supporting persistence and completion.
